THE FAMOUS MAN

Mr. Ike almost got burned on Mars!

THE FAMOUS MAN DIES!

Mr. Ike (born October 8, 1981) is a Chinese architect. His name stands for Mr. I know everything. He studied math at school, but he knew everything, so he went to study architecture.

He designed the Mars Place on Mars. He built it because the astronauts might get bored on Mars. Inside Mars Place, he made a car park, a restaurant, a shopping mall and an arcade. He built it by himself, single handedly. It's so big that it almost fits the whole Mars!

Right now, Mr. Ike is building another planet called Planet f. The whole planet is made out of metal, and it rains everyday. He is starting a new project on September 1st, 2011 for his dad's birthday present. He will build it with metal, since his dad likes metal.

Mars Place is famous because most of the astronauts just go there to try the Mars Place. Then they go back and tell everyone in the whole world. Even the aliens wanted to try it out! Planet f is not yet finished, but people already know that it would grab everyone's attention. Astronauts

sometimes go to space to find Planet f and see what it's like right now.

Some people are jealous of Mr. Ike, so they stabbed him with a knife when he was sleeping. But then, the police found out, so they killed the people who killed Mr. Ike. Their names were: Dracowomen, Trixie and Gary. The people who killed Mr. Ike (Mr. I know everything) were architects who were not as famous as he was. When Mr. Ike's parents found out, they put Mr. Ike on Planet f. From then on, people from all around the world started to call it the Planet of dead Ike.
